

Brainstorming & Idea Prioritization Template

Date	2026
Team ID	XXXXXX
Project Name	OptiCrop – Smart Agricultural Production Optimization System
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Peddehapu Niharika	Develop an AI-based crop recommendation system using soil nutrients and climate data.	Machine Learning	1
2	Polupalli Sunil	Build a web application that allows farmers to input soil parameters and receive crop recommendations.	Web Application	1
3	Romeo Mhakayakora	Compare multiple machine learning algorithms (KNN, Logistic Regression, Decision Tree, Random Forest) to identify the best prediction model.	Machine Learning	2
4	Sk Salomi	Generate intelligent agricultural reports and farming recommendations	Decision Support	

		based on prediction results.		
5	Jotshna Aditya Tadi	Create a scalable smart farming platform that can be extended with cloud deployment and IoT integration.	Future Enhancement	3

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Develop an AI-based Crop Recommendation System with a user-friendly web interface.	High	High	1	Yes
2	Apply and compare machine learning algorithms for accurate crop prediction.	High	High	2	Yes
3	Generate intelligent agricultural reports and enable future smart farming enhancements.	Medium	High	3	Yes
